Cable Organizer for the UC-PR

The Crestron® cable organizer for the UC-PR provides convenient tabletop cable management. The cable organizer routes audio and network connections from the UC-PR to a system's tabletop controller and routes audio and video connections to a user's laptop for Bring Your Own Device (BYOD) presentation.
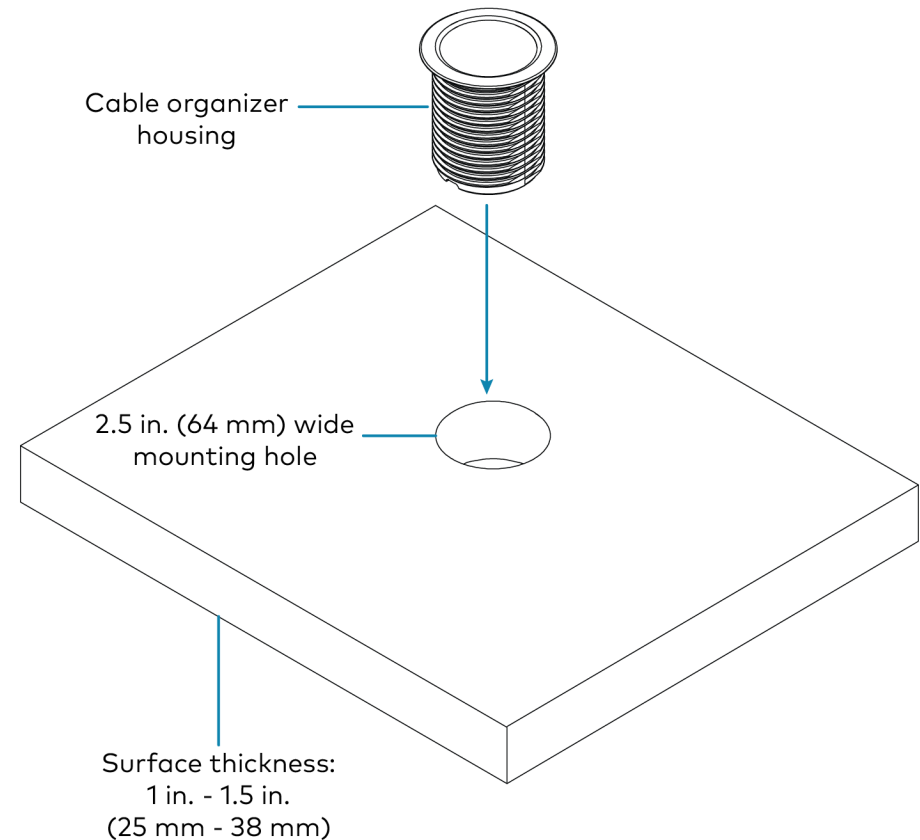

In the Box

|	
1	Cable organizer housing, Plastic, Black (2056826)
1	Cable organizer plate, Plastic, Black (2056825)
2	Locking nut, Plastic, Black (2056824)
2	Screw, 04-40, 3/8 in., Pan Head, Phillips, Black (2007170)
5	Cable tie wrap, 7.4 in. x 0.19 in., Black (2057355)

Install the Cable Organizer

To install the cable organizer:

1. Select a mounting surface with a thickness of 1 in. (25 mm) to 1.5 in. (38 mm).
2. Use a hole saw to cut a 2.5 in. (64 mm) wide mounting hole in the mounting surface.
3. Insert the cable organizer housing into the mounting hole.

Cable organizer housing

2.5 in. (64 mm) wide mounting hole

Surface thickness: 1 in. - 1.5 in. (25 mm - 38 mm)

4. Secure the cable organizer housing to the mounting surface using the included locking nuts. Ensure that the TOP label on the locking nuts faces the mounting surface.
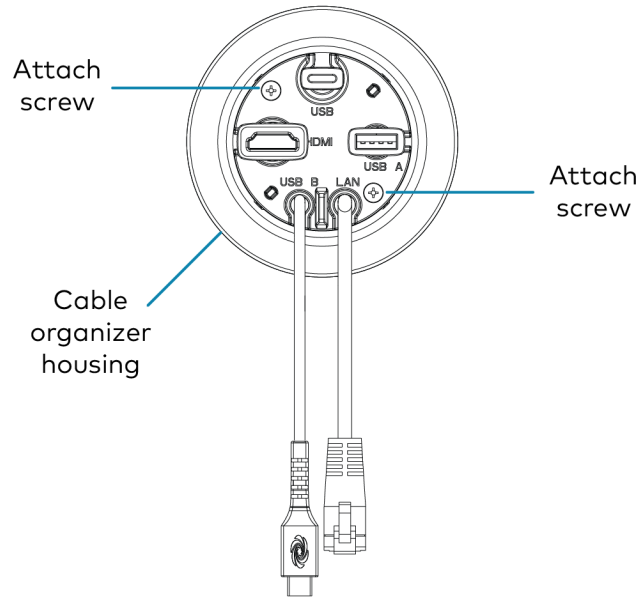

5. Pass cables through the bottom of the cable organizer housing to the tabletop.

6. Route the cables through the routing holes on the cable organizer plate. All of the necessary cables are included with the Crestron Flex conference system.

> **NOTE:** The USB B routing hole is only used in systems with a Crestron Flex MM tabletop conference device.

Cable organizer housing

Mounting surface

Locking nut (x2)

Route USB-C® cable for BYOD audio and video connection

Cable organizer plate

Route HDMI® cable for BYOD video connection

Route USB A to Micro-B cable for BYOD audio connection

Route USB A to Micro-B cable for audio connection to Flex MM Conference Device

Route CAT5e or CAT6a cable for network connection to tabletop controller

7. Attach the cable organizer plate to the cable organizer housing with the included screws.

Attach screw

Attach screw

Cable organizer housing

8. Above the mounting surface, pull all of the cables out to the needed length. Ensure that there is at least 2 in. (51 mm) of cable slack beneath the mounting surface, and attach a cable tie to each cable. Trim the cable ties as needed and push the cables back to the cable organizer plate.

> **NOTE:** The cable ties prevent overextension by catching on the bottom of the cable organizer plate when the cable is pulled to its maximum length. The added slack ensures that the cables will not disconnect from the UC-PR.

Attach cable tie wraps (x5)

Connect Devices

Connect devices using the cables routed through the cable organizer, as described in the system's Quick Start guide. Scan or click one of the following QR codes to view the system's Quick Start guide.
