100W Power Delivery

Part no	Colour
ULDPLSV2-SGR	● Space grey and black

Ports to Out-Perform Bigger Docks

Your Desk Accessories Via One Dock The Dock Plus 2 is smaller than a mobile phone but a better performer than bulkier docks. It gifts you ports – two USB-A [3.2] and a USB-C [3.2] – to activate essential desk accessories, including keyboard, mouse, screen devices and scanners. Let's not forget the spit-polished display graphics, agile data transfer, Ethernet, and 100W charging muscle in the mix either. It's also your ally when you need to hit the road with professional connectivity options.

Dual 4K Screens. Clear benefits.

4K – Display Support for Today and Tomorrow

See the Future in Dual 4K The Dock Plus 2 supports dual displays at up to 4K [60Hz*]. It's an ultra-modern dock but future-focused too. Connect it to full HD monitors today, if you will, and upgrade to eye-widening 4K displays tomorrow. With the Dock Plus 2, you can also work on different applications on different screens at the same time. That's the efficient way to do a lot more. *See resolution support table below

SINGLE 5K DISPLAY WITH MAC

The Dock PLUS delivers Mac users a picture-perfect single display for their desk set up.
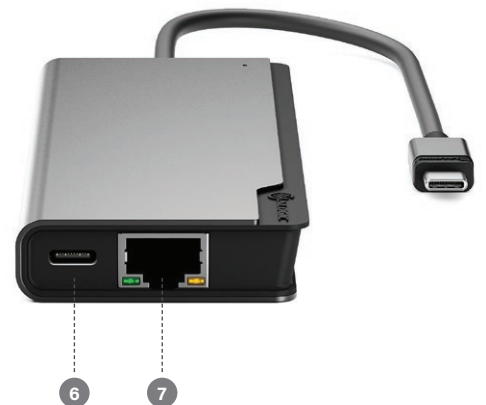

### DUAL 4K DISPLAYS WITH WINDOWS

Windows users can plug into the Dock PLUS to run up to two ultra-polished external displays.

100W Your Laptop Will Love

Empower Your Laptop The Dock Plus 2 has the power to change [and charge] your world. We're talking 100W power delivery here. Supporting the latest USB Power Delivery [PD 3.0] standards, the dock delivers a rocket battery boost for your device and speeds your data transfers, so you can focus disruption-free on your desk activity.

8 High-Performance Ports

A	LED Power Button	
B	Integrated USB-C Lead
