8718696176320

Easy smart lighting

Bring the cinema home with the Play gradient light tube large in black. Place or mount beneath a TV to cast a blend of colourful light. Rotate the tube to shine it in any direction – a perfect complement to surround lighting.

Easy smart lighting

- Game-changing Home Entertainment
- Seamlessly blend colours
- Surround lighting effects
- High-quality, versatile design
- Wash the wall with a gradient of light
- Two sizes for a perfect fit
- Hue Sync mobile app and Hue Bridge required

Highlights

Game-changing Home Entertainment

Philips Hue is the only smart lighting brand to easily sync your colour-capable smart lights with films and video games for thrilling home entertainment. The game-changing Hue Sync technology captures the content you're watching or playing and translates it into an immediate light script to create a colourful full-room experience.

Seamlessly blend colours

Get a seamless blend of multiple colours of light – at the same time – in a single lamp. The colours flow together naturally, casting light against the wall to showcase a unique effect behind your TV.

Surround lighting effects

Experience the magic of surround lighting! The Play gradient light tube reacts to the content on the entire screen in real time, creating a captivating television viewing and gaming experience. Pair with other Philips Hue colour-capable lights for a truly immersive effect. Requires the Philips Hue Play HDMI sync box and Hue Bridge (sold separately).

High-quality, versatile design

Made with sturdy, high-quality materials, the Play gradient light tube can be laid flat at the base of the TV or even mounted to the underside of a TV stand or a shelf above. No matter the location, it shines a bright, bold gradient of colourful light.

Wash the wall with a gradient of light

Rotate the light tube 340 degrees to direct its blend of colourful light anywhere you'd like, creating a wash of indirect lighting without any glare on the TV itself.

Two sizes for a perfect fit

The Play gradient light tube comes in two sizes. The compact light tube is recommended for TVs up to 55 inches, while the large light tube is recommended for 60-inch and larger TVs.

Hue Sync mobile app and Hue Bridge required

The Philips Hue Play gradient light tube requires the Philips Hue Play HDMI sync box, Hue Sync mobile app and a Hue Bridge. The Bridge also allows you to add up to 50 lights and accessories throughout your entire home, create timers and routines and control your lights from anywhere – inside or outside your home – with the Hue app. The Philips Hue Play HDMI

sync box and Hue Bridge are sold separately.
