PRODUCT INTERFACES

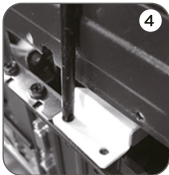

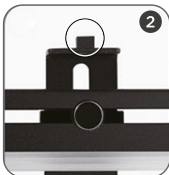

- 1 Compatible with 5V 3-Pin header* for lighting synchronization with other RGB devices, such as ZOTAC GAMING AMP Extreme Holo graphics card and motherboard.

**Not compatible to a 12V DC output*

- 2 Equipped with one 4-Pin conversion cable to allow quick connection with other RGB devices.

QUICK SETUP

- 1 Have all accessories ready before getting started.
- 2 Stick the GPU Contact Pad on top of the slider. Loosen and move the slider right or left to adjust the position for the length of your graphics cards.
- 3 Locate and remove the screws from the PCI Support Bracket from your case. Insert the GPU Support Bracket into the available slots on the case.
- 4 Install the screws to secure the GPU Support Bracket in place.
- 5 Stick the GPU Contact Pad on top of the slider and attach the slider to the cutout of the metal GPU Support Bracket body.
- 6 Tighten the screws to secure the bracket in place.
