

ScreenBeam USB Pro Switch

Unlock the power of your Microsoft Teams Rooms

USB Pro Switch enables automated and intelligent room resource switching so Microsoft Teams Rooms (MTR) can seamlessly co-exist with Bring Your Own Meeting (BYOM) and In-Room wireless presentations.

While Microsoft Teams Room (MTR) provides a simple experience for in-room participants to start a Teams meeting, it is limited in how well it can bridge the gap between people across a hybrid work environment. Simple things such as wireless content sharing from a personal device during an MTR hosted meeting require in-room participants to join the meeting just to share content. Plus, if the room display is touch-enabled, MTR limits presenter's abilities to utilize those very productive features.

When paired with the ScreenBeam 1100 Plus, the ScreenBeam USB Pro Switch overcomes these challenges and enhances UC room integration by enabling the room USB AV peripherals, such as the camera, microphone, speaker and touchscreen display capabilities, to be shared regardless of the room configuration.

Not every meeting space is equipped with an MTR. So for those spaces ScreenBeam USB Pro Switch provides users the flexibility to choose to go wireless or wired for their BYOM session, allowing guest presenters with locked down devices to still drive the meeting.

ScreenBeam USB Pro Switch

Scenarios for ScreenBeam USB Pro Switch

Visit <https://www.screenbeam.com/products/screenbeam-usb-pro-switch/> for more details.

Key Features

- ✓ Enables MTR, BYOM and in-room wireless presentations without additional room resource devices
- ✓ Enhances MTR meetings by adding wireless content sharing
- ✓ Supports annotation on touch displays during wireless content sharing sessions from Windows devices
- ✓ For rooms without an MTR, adds hardwire support for both HDMI displays and USB Cameras

BYOM Wireless or Wired

Scenario: For rooms without a UC platform, ScreenBeam USB Pro Switch provides support for either BYOM or wired connections.

BYOM Plus MTR (shared camera only)

Scenario: For rooms configured with MTR but user wants to add flexibility of BYOM for non-MTR meetings.

BYOM Plus MTR (shared camera and touchscreen)

Scenario: For users that desire the ultimate flexibility of a MTR with content sharing, BYOM plus touch display support for Windows devices, two ScreenBeam USB Pro Switches are required.

Industry Leader

ScreenBeam Inc., is a leading wireless display and conferencing innovator delivering an OS-native screen sharing experience on any modern device with agnostic support for all major video conferencing platforms.

ScreenBeam solutions power seamless hybrid collaboration in any meeting or learning space, and only ScreenBeam is Microsoft's co-engineering partner for wireless display. Headquartered in San Jose, CA, ScreenBeam has offices across the United States, Europe and Asia. To learn more about ScreenBeam, visit <https://www.screenbeam.com>.
