[Lindy 3m DVI-D \(with USB\) to DP Active Adapter Cable, Black:](#)

This adapter cable accepts video signals via DVI-D input and converts it into a DisplayPort signal. This allows DVI-D equipped workstations or PC's to be connected to modern DisplayPort monitors, with support for DVI-D single link resolutions up to 1200p 60Hz (1920x1200).

Due to its lower power design the converter can typically be powered directly from a PC's DVI-D port, in cases where the power output of the DVI-D port is insufficient (lower than 450mW) the integrated USB cable can be connected to a USB port or USB power supply to power the converter.
