[Microsoft Windows Server Standard 2022:](#)

Organizations are digitally transforming their operations and running business-critical workloads that span across cloud, on-premises, and the edge. As a result, the need to secure workloads and data has never been greater.

Windows Server 2022 enables you to run business-critical workloads anywhere — in your datacenter, in the cloud, and at the edge — while staying ahead of emerging security threats and helping secure your data. This release builds on the advancements made in Windows Server 2019, the fastest adopted Windows Server ever.

Windows Server delivers advanced multi-layer security, hybrid capabilities with Azure, and a flexible platform to modernize applications with containers.
