Easily connects a single-mode Mini DisplayPort source with DVI-I cable.

The Manhattan Passive Mini DisplayPort to DVI-I Adapter establishes a fast and convenient connection between a Mini DisplayPort source and a DVI display. This passive adapter requires a DP++ (dual-mode) video/graphics card to regenerate the signal and ensure the best connection to an HD display. Nickel-plated contacts and full shielding help the Manhattan Passive Mini DisplayPort to DVI-I Adapter provide clear and stable video transmissions in HD, home and office multimedia applications. Durable PVC jackets and moulded boots with strain relief help ensure that connections remain uninterrupted and steady.
